a. *England*

At his trial for treason in 1649, King Charles I rejected the charges brought against him by Parliament. He made this statement to his judges and accusers:

This is not my case alone. It is about the freedom and the liberty of the people of England . . . Pretend what you [Parliament] will, I stand more for . . . liberties of the People. For if power without [principles] may make laws, may alter the fundamental laws of the Kingdom, I do not know what Subject . . . in England . . . can be sure of his life, or anything that he calls his own.

The historian, Albert Soboul, wrote this about the role of the sans-culottes in the French Revolution:

Without [the popular movement of people in Paris who called themselves sans-culottes] the revolutionary leaders of 1789 would not have succeeded in such a radical manner. Between 1789 and 1794, the sans-culottes were a powerful weapon of revolutionary struggle and national defence. In 1793, the popular movement [established] a Jacobin revolutionary government, thus defeating the counter-revolution at home and abroad. The triumph of the popular movement in the summer of 1793 led to the Terror, which was needed for the final destruction of the old society.

[adapted]

- ii. To what extent do you agree with Soboul's interpretation?

OR

d. *Russia*

In 1990, the historian, Edward Acton, described the role of the Bolshevik Party in 1917 in this way:

The Party took the leading role in organising the masses. It was under its guidance that the popular democratic institutions were formed and consolidated. Party activists were developing factory committees, organising the workers' militia, strengthening the committees of soldiers and sailors, and coordinating the nation-wide network of Soviets. The Party's leadership was always vital. By instilling discipline into the ranks of its followers, by restraining them from early attacks against the government, and by concentrating their attention on the crucial issue of state power, it shaped an unstoppable revolutionary movement.

[adapted]
