Jones (Mr)

SEMESTER 2 EXAMINATIONS - NOVEMBER 2017

Year 11 Mathematical Methods Examination

Reading time: 10 Minutes
Writing time: 120 Minutes

#### Marks Allocated:

Sections within Booklet	Number of Questions	Number of Marks
Exam 2		
Multiple Choice	20	20
Extended Answer	5	60

#### **Specific Instructions**

Multiple Choice: Calculator and summary book allowed. Answer on multiple choice answer sheet Extended Answer: Calculator and summary book allowed.

In all questions where a numerical answer is required, an exact value must be given unless otherwise specified.

In questions where more than one mark is available, appropriate working must be shown. Unless otherwise indicated, the diagrams in this book are not drawn to scale.

#### Supplies and Equipment

**Supplies:** Please ensure you have the correct supplies/instruments for taking the examination before you enter the examination venue (e.g. pencils, pens, calculator, ruler, etc). There will be no sharing allowed. No other paper, etc. will be allowed to come in with you unless instructed as Specific Instructions. A clear bottle containing only water is permissible.

At the Conclusion: Please wait quietly for specific instruction as to how you will be dismissed. Leave your examination paper on your table. Pick up unwanted papers around you, push your chair under the table, and put your rubbish in the bin on your way out of the examination room.

## **Multiple Choice**

Place answers on provided multiple choice answer sheet.

#### Question 1

If 
$$A = \begin{bmatrix} 8 & 2 \\ 11 & 3 \end{bmatrix}$$
 then  $A^{-1} =$ 

$$\mathbf{A} \ \frac{1}{2} \begin{bmatrix} -8 & 11 \\ 2 & -3 \end{bmatrix}$$

$$\mathbf{B} \ \frac{1}{2} \begin{bmatrix} 3 & -2 \\ -11 & 8 \end{bmatrix}$$

$$\mathbf{C} \ 2 \begin{bmatrix} -8 & 11 \\ 2 & -3 \end{bmatrix}$$

$$\mathbf{D} \ 2 \begin{bmatrix} 3 & -2 \\ -11 & 8 \end{bmatrix}$$

$$\mathbf{E} \ -\frac{1}{2} \begin{bmatrix} -8 & 11 \\ 2 & -3 \end{bmatrix}$$

### **Question 2**

If 
$$\mathbf{A} = \begin{bmatrix} 3 & 2 \\ 5 & 7 \end{bmatrix}$$
,  $\mathbf{B} = \begin{bmatrix} 3 & -11 \\ -5 & 2 \end{bmatrix}$  and  $\mathbf{C} = \begin{bmatrix} 16 & 21 \\ 35 & 70 \end{bmatrix}$ , and  $\mathbf{AX} + \mathbf{B} = \mathbf{C}$  then  $\mathbf{X}$  is

$$\mathbf{A} \begin{bmatrix} 1 & 8 \\ 5 & 4 \end{bmatrix}$$

$$\mathbf{B} \begin{bmatrix} 11 & 88 \\ 55 & 44 \end{bmatrix}$$

$$\mathbf{C} \begin{bmatrix} 13 & 32 \\ 40 & 68 \end{bmatrix}$$

$$\mathbf{D} \begin{bmatrix} 7 & -2 \\ -5 & 3 \end{bmatrix}$$

$$\mathbf{E} \begin{bmatrix} 21 & 13 \\ 8 & 7 \end{bmatrix}$$

The matrix which describes the composition of mappings

- dilation of factor 3 from the x-axis
- reflection in the line y = x
- reflection in the x-axis

is

$$\mathbf{A} \left[ \begin{array}{cc} 3 & 0 \\ -1 & 3 \end{array} \right]$$

$$\mathbf{B} \left[ \begin{array}{cc} 0 & 0 \\ -1 & 3 \end{array} \right]$$

$$\mathbf{C} \left[ \begin{array}{cc} 3 & 0 \\ -1 & 0 \end{array} \right]$$

$$\mathbf{D} \left[ \begin{array}{cc} 0 & 0 \\ -3 & 1 \end{array} \right]$$

$$\mathbf{E} \left[ \begin{array}{cc} 0 & 3 \\ -1 & 0 \end{array} \right]$$

#### **Question 4**

A transformation described by the  $2 \times 2$  matrix  $\begin{bmatrix} 0 & 5 \\ -1 & 0 \end{bmatrix}$  maps the point with coordinates (a, b) to the point (10, 20), where (a, b) is

- **A** (4, 2)
- **B** (-20, 2)
- C (-2, 20)
- **D** (-2, 4)
- E (-20, -2)

#### **Question 5**

$$\frac{(2x^2y^4)^3}{3(xy^2)^4} \div \frac{32xy}{9y^6}$$
 is equal to

$$\mathbf{A.} \qquad \frac{3xy^9}{4}$$

**B.** 
$$\frac{3x^5y^9}{4}$$

C. 
$$\frac{9xy^9}{16}$$

**D.** 
$$\frac{9x^5y^9}{16}$$

**E.** 
$$\frac{256x^3}{27y}$$

 $3\log_{a}(2) + \log_{a}(5) - \log_{a}(10)$  is equal to

- $\log_a(a^2)$ A.
- $\log_a(1)$ В.
- C.  $\log_a(3)$
- D.  $\log_a(4)$
- $\log_a(16)$ Ε.

### Question 7

Let  $f:[0,\infty) \to R, f(x) = 5^{2x} + 3$ .

The range of f is

- A.  $(-\infty, 3]$
- (3,∞) В.
- C. [3,∞)
- D.  $(4,\infty)$
- [4,∞) E.

### Question 8

For the function:  $g(x) = \log_{10}(x - 1) + 2$ , the maximal domain is:

- $(-\infty,\infty)$ A.
- $(-1,\infty)$
- В. С.  $(0, \infty)$
- $(1, \infty)$ D.
- Ε.  $(2, \infty)$

### Question 9

The x-intercept of the graph of  $y = \log_a (3x + 2)$  is

- A.
- В.
- C.
- D.
- E.

The population P of a regional centre is modelled by the function

$$P(t) = 34\,500 \times 10^{-0.1t} + 23\,000$$

where t is measured in years and t = 0 represents 1 January 2017.

According to this model, the population of this regional centre over the long term will approach

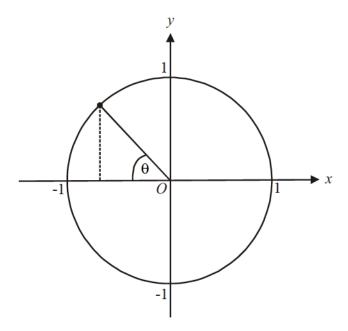

- **A.** 11 500
- **B.** 23 000
- C. 34 500
- **D.** 46 000
- **E.** 57 500

### **Question 11**

To convert the angle  $\frac{\pi}{12}$  to degrees, it must be multiplied by

- A.  $\pi$
- **B.**  $\frac{180^{\circ}}{\pi}$
- C.  $\frac{\pi}{360^{\circ}}$
- $\mathbf{D.} \qquad \frac{\pi}{180^{\circ}}$
- E.  $\frac{15^{\circ}}{\pi}$

The diagram below shows a unit circle.

The length of the vertical dotted line shown, represents

- **A.**  $\cos(-\theta)$
- **B.**  $cos(\theta)$
- C.  $\sin(\pi \theta)$
- **D.**  $\cos(\pi \theta)$
- **E.**  $\sin(2\theta)$

#### **Question 13**

The temperature T (in degrees Celsius) in a controlled environment is given by the function,

$$T(t) = 21 + 7\sin\left(\frac{\pi t}{12}\right), \quad t \ge 0$$

where t is measured in hours and t = 0 corresponds to 9am on Monday.

At 8pm on the same Monday, the temperature in degrees Celsius, is closest to

- **A.** 21.3
- **B.** 22.8
- C. 25.9
- **D.** 26.6
- **E.** 27.2

A graph which has an amplitude of 2 and a period of  $\pi$  could have a rule given by

- $A. y = \sin(\pi x) + 2$
- **B.**  $y = 2\sin(\pi x)$
- $\mathbf{C.} \qquad y = \sin(2x) + 2$
- **D.**  $y = 2\sin(2x) + 4$
- **E.**  $y = \pi \sin\left(\frac{x}{2}\right)$

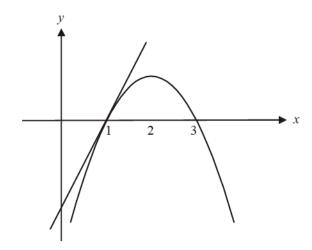

### Question 15

The graph of  $y = 3\cos(2x) - 1$  for  $x \in R$ , has a minimum value of

- **A.** 2
- **B.** 0
- **C.** -1
- **D.** -3
- $\mathbf{E}$ . -4

#### **Question 16**

The graph of the function  $y = -x^2 + 4x - 3$  is shown below.

A tangent is drawn to the graph at the point (1,0). The gradient of the tangent is

- **A.** -3
- **B.** 0
- **C**. 1
- **D.** 2
- E. 3

Given that  $g(x) = \frac{2}{x} + \sqrt[3]{x}$ , then g'(8) is equal to

**A.** 
$$\frac{5}{96}$$

**B.** 
$$\frac{9}{4}$$

#### **Question 18**

Grain is being poured into a silo. The height h, in metres, of grain in the silo t hours after it has started to be poured in, is given by

$$h(t) = -t^3 + 12t, \quad t \in [0,2]$$

The rate, in metres per hour, at which the height of the grain in the silo is changing when t=1 is

**A.** 9

**B.** 11

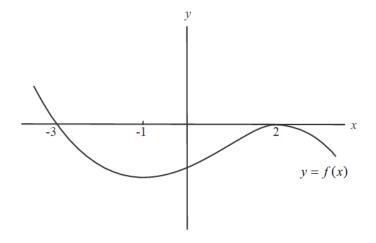

**C.** 13

**D.** 15

**E.** 17

#### **Question 19**

The graph of the function f is shown below.

Which one of the following statements is **not** true?

**A.** f'(-1) = 0

**B.** f(2) = 0

C. f'(2) = 0

**D.** f(-3) = 0

**E.** f'(-3) = 0

The instantaneous rate of change of the function  $y = \frac{3}{x^2}$  when x = -1 is

- A. -6
  B. -3
  C. 0
  D. 3
  E. 6

# END OF MULTIPLE CHOICE

#### Extended answer

Working out required where appropriate

Place answers in the space provided on the exam paper.

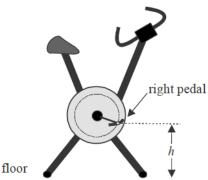

#### Question 1 (12 marks)

An athlete straps her feet into the pedals of an exercise bike.

For the first part of her training session, the height h, in centimetres, of the right pedal above the floor, t seconds after she begins pedalling is given by

$$h(t) = 12\cos(4\pi t) + 24, \ t \in [0,120].$$

The exercise bike is shown below.

ì.	What is the starting height, in centimetres, of the right pedal above the floor? 1 mark	
<b>)</b> .	What is the mean height, in centimetres, of the right pedal above the floor? 1 mark	
	Find the maximum height above the floor that the right pedal reaches. Express your answer in centimetres.	
1.	How long does it take for the right pedal to complete one revolution? Express your answer in seconds.	
<u>.</u>	How many complete revolutions does the right pedal complete in this first part of the athlete's training session?  1 mark	

- What is the height above the floor of the right pedal 7.25 seconds after the athlete begins pedalling?
   Express your answer in centimetres.
- g. When will the right pedal be 18 centimetres above the floor for the first time? 2 marks

The athlete stops and has a drink before resuming pedalling.

The height, in centimetres, of the right pedal of the exercise bike above the floor *t* seconds after she begins pedalling during this next part of her training session is given by the function

$$f(t) = 12\cos(4\pi t) + 24$$

but this time she only pedals for 2 seconds before stopping; that is,  $t \in [0,2]$ .

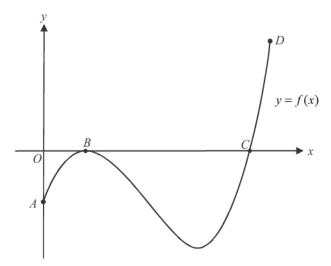

**h.** On the set of axes below, sketch the function f. Label the endpoints clearly. 4 marks

### Question 2 (9 marks)

Let  $f(x) = (x-1)^2(x-5)$  where  $0 \le x \le 6$ .

The graph of f is shown below.

The points A and D are the endpoints of the graph and points B and C are the x-intercepts of the graph.

**a.** Find the coordinates of

1 mark

i. point A.

1 mark

**ii.** point B.

1 mark

iv. point D.

point C.

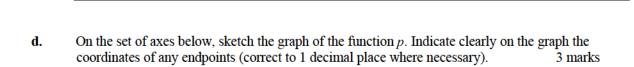

iii.

1 mark

**b.** Find the range of f.

3 marks

c.	Show that $f(x) = f'(x)$ at point $B$ .	2 marks
Questi	ion 3 (14 marks)	
The av	grown from genetically modified seeds are observed. Verage height $p$ , in centimetres, of a batch of genetically modified seedlings $t$ days after d out is given by	they were
	$p(t) = 2.8 \times 5^{0.013t} + 4, \ t \in [0,120]$	
a.	For how many days were the plants observed?	1 mark
b.	What was the average height of the seedlings when they were planted out?	1 mark
c.	What was the average height of the seedlings 100 days after they had been planted or answer correct to two decimal places.	nt? Give your 1 mark

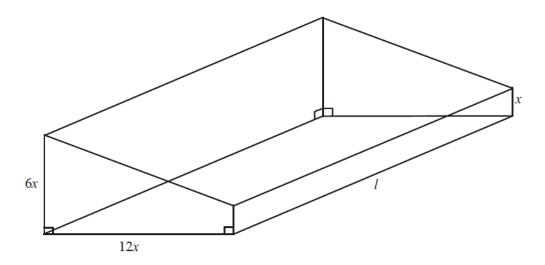

e.	Find the number of days it took for the seedlings to reach an average height of 10cm after have been planted out. Give your answer correct to the nearest whole number.  2 mark				
Find th	ne average rate of change of $p(t)$ between day 10 and day 60.				
	Give your answer in cm/day correct to two decimal places.	2 marks			
	lly, these type of plants grown from genetically modified seed, reach a suitable height for seedlings have been planted out for 100 days.	or harvesting			
f.	How many days after the seedlings have been planted out would they have reached <b>ha</b> suitable height for harvesting? Express your answer correct to two decimal places.	lf this 2 marks			
A batch observe	h of the same type of plants, but which had grown from non-genetically modified seed, ed. The average height, in centimetres, of these non-genetically modified plants is give	was also n by			
	$n(t) = 2.8 \times 5^{kt} + 4, \ t \in [0,120]$				
where t	represents the number of days since the seedlings were planted out and $k$ is a positive, at.	real,			
	erage height of these plants was 9 centimetres, thirty days after the seedlings had been p	olanted out.			
g.	Find the value of $k$ . Give your answer correct to three decimal places.	2 marks			

### Question 4 (16 marks)

A display cabinet is in the shape of a triangular prism resting on top of a rectangular prism. The framework of the cabinet is to be made from 800cm of timber. The framework, including dimensions in cm, is shown in the diagram below.

Show that	l = 200 - 16x.			

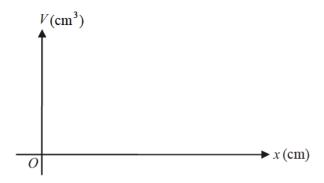

3 marks

V = $8400x^2 - 672x^3$ .	поу
	2
Find the value of $x$ for which the volume of the cabinet is a maximum.	
Find the value of <i>l</i> , in cm, when the volume of the cabinet is a maximum.	2
That the value of t, in chi, when the volume of the caomet is a maximum.	
	2
Find the maximum volume of the cabinet in cm <sup>3</sup> .	
	2

f. On the set of axes below sketch the graph of the volume function given in part b.

$$V = 8400x^2 - 672x^3$$

Indicate clearly any intercepts, endpoints and turning points.

3 marks

**g.** Write down the domain and the range of the volume function.

2 marks

## Question 5 (9 marks)

The matrix equation X' = AX + B defines a transformation where  $A = \begin{bmatrix} 2 & 0 \\ 0 & 4 \end{bmatrix}$  and  $B = \begin{bmatrix} -3 \\ 2 \end{bmatrix}$ .

The curve with equation  $y = x^2$  undergoes this transformation.

a.	Show that the image produced is given by $y = (x+3)^2 + 2$ .	4 marks
----	--	---------

c.	Find the	e coordinates of the points of intersection of $y = \frac{x}{2} + 5$ and $y = (x + 3)^2 + 2$	21
			2 marks

# **END OF EXAM**
